COURSEWORK

UNDERGRADUTE

Computational Linguistics

Data Science for Natural Language

Probability

Statistics

Software Design

Functional Programming

Advanced Discrete Mathematics

Mathematical Logic

Data Structures & Algorithms

Advanced Calculus

SKILLS

PROGRAMMING LANGUAGES

Python • Java • Lisp (Clojure) • R •

OCaml • Bash • VBA •

FRAMEWORKS & LIBRARIES

Plotly Dash • ggplot2 • Pandas • NumPy

• nltk

TOOLS

Git • Hugo • Heroku • IntelliJ IDEA •

PyCharm • Visual Studio Code •

Markdown • CLI

LANGUAGES

NATIVE FLUENCY

English • French

PROFICIENCY

Mandarin Chinese

EXPERIENCE

BELL CANADA | FIELD SERVICES CONSULTANT INTERN

May 2020 - Aug 2020 | Montreal, QC

- Created Plotly Dash app to optimize internal reporting and analysis via cross-filtering across dashboards. In production.
- Analyzed, developed and presented business case around integration of NLP-based solution to automate and optimize internal issue reporting
- Developed and deployed prototypes throughout summer to favor stakeholder buy-in

GROUPE CH & EVENKO | LOGISTICS & SECURITY COORDINATOR

Summers 2018 & 2019 | Montreal, QC

- Led and oversaw the deployment of 50+ RFID access points during 77, Heavy MTL, Osheaga, IleSoniq festivals
- Acted as liaison between Evenko, Connect & Go, and 3 different security companies
- Updated and tracked Security Department's budget on a daily basis for Evenko & Spectra festivals

COMMUTERS OF MCGILL (COMUNITY) | SENIOR COORDINATOR

Oct 2018 - May 2020 | Montreal, QC

- Contributed to the organization and supervision of weekly and monthly social events targeted toward commuter students at McGill
- As main logistics coordinator, oversaw the 2019 edition of Off-Campus Connects, an orientation event with 600+ student attendance

PROJECTS

TEXT FILE TOKENIZER | FALL 2020

Python, Plotly Dash, Pandas, nltk, Heroku, Bootstrap

Created a .txt file **tokenizer** which visualizes word frequency in input file.

Used nltk and Pandas to process text and Plotly Dash to visualize results.

Deployed application on Heroku.

STORIFY | MCGILL CODEJAM (FALL 2019)

Python, Requests, Swift, Spotify API, Microsoft LUIS

Created iOS writing app with machine-learning based text and music suggestion.

Worked on building sentiment analysis model via Microsoft LUIS and integrating it with Spotify API into a final, coherent product

WHAT'S THAT WOOF | MCWICS HACKATHON (SPRING 2019)

Android Studio, Java, Python, Flask

Created Android dog breed identifier which uses machine learning to identify dog on pictures taken by users.

Worked on building Android application front-end and integrating Python back-end.

Used Android's built-in camera API

AWARDS

2019 Best Design McWics Hackathon

2018 Best Speaker Dawson Case Competition
